

France – An educational and experimental garden
Les jardins de la Providence, Bourg en Bresse (Ain)

The allotment and community gardens in Bourg-en-Bresse opened their educational and experimental garden on February 22nd, 2014.

Its aim is to enable people to discover and learn the methods of a natural gardening. Our animation project is supported by the town of Bourg-en-Bresse, the regional General Council and GrDF (Gaz Réseau Distribution France).

In 50 m² plots, the members have to garden in accordance with the rules of the ecological charter. Every gardener has accepted not to use chemical products, fertilizers or pesticides. The project aims to offer the possibility to learn the acts and methods of a natural gardening to all the gardeners and to the citizens of the region. A plot of 400 m² is reserved for citizens who are not members of the association, but are keen to learn.

You can find more information about the project on our homepage:
